

## **Collegio IMAA's Program (Mechanics and Automotive)**

for the 2023-2025 term

By Alter.POLIS representatives from the college

### **DIALOGUE BETWEEN STUDENTS AND REPRESENTATIVES**

We intend to hold periodic college assemblies to foster communication between students and representatives and to be able to bring problems encountered by the student community to the attention of those in charge. We will also make questionnaires and forms to collect suggestions from students who cannot be present during the assemblies.

### **EDUCATIONAL TRIPS**

We intend to make guided tours to companies and/or laboratories relevant to our course of study ordinary because we believe that experiences of this kind can be an added value that cannot be achieved by lectures alone.

### **ERASMUS AND INTERNATIONALIZATION**

We will propose the opening of new international mobility projects (Erasmus) to all students regardless of whether or not they belong to the "enterprising youth" pathway.

### **CERTIFICATIONS**

We believe that it is essential to obtain educational and professionalizing courses that enable one to receive certifications useful in the working world for example to certify software knowledge that otherwise would not be recognized.

### **ALPHABETICAL ALIGNMENT**

We will ask that the different alphabets be aligned so that one's last name does not discriminate one's career by making some courses more difficult than other alphabets.

### **VIDEO LESSON**

We will ask to keep recorded lectures taken during the DAD period and propose to make them accessible to students taking the course in subsequent years.
